

SHALEEN GORAKATAR

Vancouver, British Columbia | (778) 871-3074 | gorakatarshaleen@gmail.com | www.linkedin.com/in/shaleengorakatar

SKILLS

Languages: Python (PySpark), R, SQL, TypeScript, JavaScript, HTML/CSS.

AI & Machine Learning: LLMs (RAG, Agentic Workflows, Function Calling), LangChain, Hugging Face, TensorFlow, scikit-learn, pgvector, Prompt Engineering, OpenAI Whisper.

Backend & Cloud: FastAPI, PostgreSQL, Supabase, AWS (S3, Glue, Redshift, SageMaker), Docker, REST APIs.

Frontend: React 18, Tailwind CSS, Power BI.

Tools & Quant: Statistical Modeling, Git/GitHub, Playwright, Jira.

EDUCATION

University of British Columbia, Vancouver, BC

May 2027

Bachelor of Science, Major in Statistics

- **Relevant Coursework:** Statistical Inference for Data Science, Data Analysis using Algorithms, Stochastic Processes, Applied Machine Learning, Models of Computation, Software Construction.

WORK EXPERIENCE

MetricStream, AI Engineer, Intern, Remote (Vancouver, BC | San Jose, CA)

May 2025 - April 2026

- **Developed Agentic AI applications** from complex requirement specifications for Fortune 500 clients (PepsiCo, Glencore); utilized **data analysis** to drive AI product decisions, resulting in automated GRC workflows that significantly reduced manual enterprise risks.
- Architected a high-precision RAG pipeline (Python, pgvector) achieving 86% precision across 1.2M paragraphs; **Led prompt-engineering sprints** and maintained comprehensive **AI product documentation** to lower hallucination rates by **30%**; implemented automated regression testing and knowledge chunking to ensure enterprise-grade reliability.
- Engineered parallel AI pipelines (FastAPI, GPT-4o, Whisper) and OpenAI Tool Calling for deterministic GRC generation and incident analysis, reducing authoring time by **~60%** and processing latency by **70%** across 60+ global sites.
- **Architected an end-to-end agentic platform** featuring a custom user-interaction layer and automated Playwright data extraction; **fine-tuned off-the-shelf LLMs** into domain-specific models to automate compliance reporting, cutting manual workload by **40%**.

Genpact, Data Engineer, Intern, Gurugram, India

July 2024 - September 2024

- Built a high-throughput **data ingestion framework** using **AWS Glue** and **S3** to integrate external datasets into the Data Lakehouse, ensuring ADLS Gen2 compliance and boosting ingestion speed by **30%**.
- Designed an **automated table-health monitor** (PySpark, SQL, Fabric Notebooks) to support migration from on-prem to Microsoft Fabric; system auto-detected skew and triggered vacuum workflows, improving query speed by **34%**.
- Developed real-time **Power BI dashboards** to monitor pipeline efficiency, providing engineering stakeholders with instant visibility into ingestion latency and system health.

EXTRACURRICULAR EXPERIENCE

UBC Quantico, Lead Analyst, Vancouver, BC

November 2024 - September 2025

- Co-founded quantitative research club at The University of British Columbia and led a team of analysts in developing algorithmic trading strategies; architected back testing frameworks in Python to evaluate portfolio optimization and risk metrics.

PERSONAL PROJECTS

CricMaxx | Real-Time Cricket Prediction Markets Platform

December 2025 - Present

- Engineered a cricket data ingestion system using Supabase Edge Functions as secure API proxies with **5-min TTL caching**; architected an automated oracle-based resolution engine that evaluates live player statistics against threshold rules to deterministically settle **200+ prediction markets**.
- Developed a **high-concurrency trading interface** (React 18, TS) utilizing WebSockets for real-time L2 order-book streaming; implemented optimistic UI updates and **PostgreSQL Row-Level Security (RLS)** to ensure atomic wallet operations for 1,200+ markets.
- Architected a **high-performance FIFO price-time priority matching engine** supporting both **limit and market orders** with dual-sided pricing; integrated **10% slippage protection** and **net-obligation netting** to optimize liquidity and minimize settlement transactions.
