SHALEEN GORAKATAR

Vancouver, BC | (778) 871-3074 | gorakatarshaleen@gmail.com | linkedin.com/in/shaleengorakatar | shaleengorakatar.github.io

TECHNICAL SKILLS

Languages: Python, R, SQL, TypeScript, JavaScript, HTML/CSS
AI & Machine Learning: LLMs (RAG, agentic workflows, function calling), LangChain, Hugging Face, TensorFlow, scikit-learn, pgvector, OpenAI Whisper
Backend & Cloud: FastAPI, PostgreSQL, Supabase, AWS (S3, Glue, Redshift, SageMaker), Docker, REST APIs
Frontend & Tools: React 18, Tailwind CSS, Power BI, Git/GitHub, Playwright, Jira

EDUCATION

University of British Columbia **May 2027**
Bachelor of Science, Major in Statistics *Vancouver, BC*

- Relevant coursework: Statistical Inference for Data Science, Stochastic Processes, Applied Machine Learning, Applied Linear Algebra, Mathematical proofs, Probability, Models of Computation, Software Construction, Data Structures and Algorithms, Relational Databases, Design and Analysis of Experiments, Methods for Statistical Learning

EXPERIENCE

MetricStream **May 2025 - Apr 2026**
AI Engineer Intern *Vancouver, BC (Remote)*

- Built a retrieval-augmented generation (RAG) pipeline in **Python** with **pgvector** for search across **1.2M+** compliance paragraphs, adding automated regression testing and knowledge chunking to reduce hallucination rates by **30%**
- Developed agentic AI applications from client requirement specifications in **Python and FastAPI**, automating governance, risk, and compliance (GRC) workflows for Fortune 500 clients including PepsiCo and Glencore
- Engineered parallel AI pipelines with **GPT-4o, Whisper, and OpenAI tool calling** for deterministic GRC document generation and incident analysis, reducing authoring time by roughly **60%**
- Built an end-to-end agentic platform with a custom user-interaction layer and automated **Playwright** data extraction, and fine-tuned off-the-shelf LLMs into domain-specific models for compliance reporting

Genpact **Jul 2024 - Sep 2024**
Data Engineer Intern *Gurugram, India*

- Built a data ingestion framework using **AWS Glue and S3** to integrate external datasets into the data lakehouse, improving ingestion speed by **30%**
- Designed an automated table-health monitor in **PySpark and SQL** that detected data skew and triggered vacuum workflows during migration to Microsoft Fabric, improving query speed by **34%**
- Developed real-time **Power BI** dashboards giving engineering stakeholders visibility into ingestion latency and pipeline health

UBC Quantico **Nov 2024 - Sep 2025**
Co-Founder & Lead Analyst *Vancouver, BC*

- Co-founded UBC's quantitative research club and led a team of analysts developing algorithmic trading strategies, building back testing frameworks in **Python** to evaluate portfolio optimization and risk metrics

PROJECTS

CricMaxx - Real-Time Cricket Prediction Markets | *React 18, TypeScript, PostgreSQL, Supabase* **Dec 2025 - May 2026**

- Built a FIFO price-time priority matching engine supporting **limit and market orders** with dual-sided pricing, slippage protection, and net-obligation netting to minimize settlement transactions
- Developed a real-time trading interface in **React 18** with **WebSocket** L2 order-book streaming, optimistic UI updates, and PostgreSQL row-level security for atomic wallet operations across **1,200+** markets
- Engineered a data ingestion layer using **Supabase Edge Functions** as secure API proxies with 5-minute TTL caching, and an oracle-based resolution engine that settles **200+** prediction markets against live player statistics

Bronson - Agentic Workflow Orchestrator | *Winner, Greptile Track, Cursor Hackathon* **May 2026**

- Built an orchestrator in a 12-hour hackathon with a team that resolves YAML-defined **DAG pipelines** of LLM agents into **parallel execution waves** with human-approval gates
- Developed the **Express** orchestration backend with server-sent events to stream execution state, gate approvals, and event logs to a **Next.js** UI in real time
- Designed shared **Zod** schemas in a TypeScript monorepo to validate pipeline definitions and API contracts across the web and orchestrator services
